

# TRANSPORTATION AND ACCOMMODATION

## 1. TRANSPORTATION

CERN has two main sites, one in France and the other in Switzerland. Please note that CERF Facility is located on the Prévessin site of CERN in France. You can find detailed information on how to arrive at CERN [here](#) .

For transportation between the two main CERN sites you can use the CERN Shuttle. You can find more information about the circuits of the CERN Shuttle [here](#).

However, the use of a car is recommended. The CERN car-sharing scheme provides CERN vehicles on a self-service basis. A pool of 35 vehicles are available for pickup from 15 locations around the Meyrin and Prévessin sites. In case you want to use the service, you must have a valid driving licence, a valid CERN access card and a CERN ID. A driving authorization ([EDH document: Car Driving Authorisation](#)) issued by CERN is also required. For more information on the car-sharing scheme you may consult [here](#).

## 2. ACCOMMODATION

You can find accommodation in France or in Switzerland. You can find a hotel close to CERN (Saint Genis-Pouilly, Prévessin) or you can opt for the CERN Hotel or the CERN Hostel. For accommodation in the CERN Hotel (in Meyrin) or in the CERN Hostel (in Saint-Genis-Pouilly) you may consult [here](#).

**Please note:** Switzerland is not within the EU so we recommend that you avoid taking your instrumentation into Switzerland, as this requires you to fulfil additional custom formalities.
